

# MSP® MethodTemplate

*“...a useful addition to the armoury of the programme office team and would provide a good basis on which to develop the documentation for a programme.”*

APMG assessor on behalf of OGC

**PROJECT in a box**  
*“Your own Project Support Office”*

The PROJECT in a box Method Template for Managing Successful Programmes® is unique in providing you with fully authentic MSP® materials under licence from Axelos.

Add the MSP® Method Template to your server and it provides you with all the standard materials and structure you need to manage programmes in your organisation:

- Navigation and Process diagrams
- Template files and tools
- Extensive guidance content

All Authentic, directly from the MSP® manual under licence and structured and packaged so you can easily add your programme and get up and running in a matter of minutes.

Of course you still get to use all the functionality of PROJECT in a box but now you can get the benefits with your programmes as well.

documentation so that the Programme Support Office can see when changes are being made or even make changes themselves. Similarly, programme documents can be live shared with the project teams. For example the central Programme Plan could be made available within each project. This capability is all controlled by the permissions model so access can be given selectively and can vary depending on the people and projects involved.

The PSO tools like Searching, Notifications and reporting all work on documents shared between a programme and projects in this way, giving you unprecedented information, control and flexibility with minimal effort.

### Navigation and Reporting

Your newly created programme will sit neatly within PROJECT in a box with menus aliased to reflect programme and project structure rather than the project and stage format used in the PRINCE2®, Atern® or other method projects.

For ease of navigation you can also create Portfolios which contain the programme and its constituent projects which help navigation and are an excellent starting point for reporting. The Dashboard also differs for your Programme enabling you to use this report type simply across any method hosted on your server.

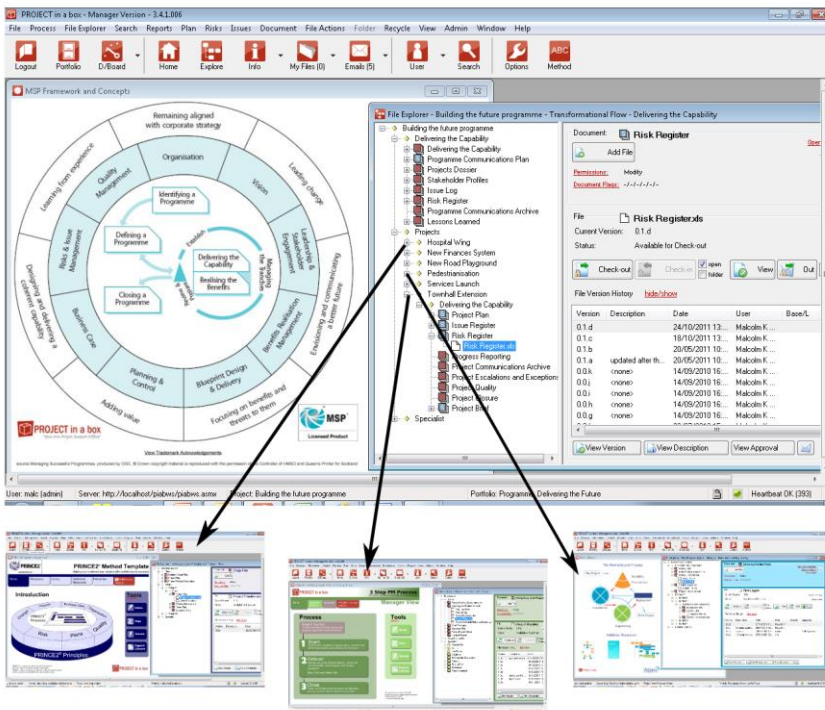

### Personalisation

As with all Method Templates you can use Method Manager to personalise this to more closely match your organisation's requirements be that as simple as adding logos and changing styles. For those with greater needs the templates can be customised and the processes extended, removed or remodelled to change the content of method - perhaps including existing corporate documents or links to existing sources of information.

### Authentic materials

PROJECT in a box has obtained a licence from OGC the owners of the MSP methodology to reproduce the entire content of the MSP Manual as part of our MSP Method Template. Almost all the manual is included as guidance documents available within each of the processes and grouped together in the Programme Library for ease of reference.

This re-use of authentic material is another way in which the MSP Method Template is set apart from other systems as the original nature of the material keeps your processes authentic and is familiar helping your team to get up and running quickly.

### Programme and project interaction

As your Programme management capability will be hosted on the same server as your projects they can interact to whatever degree you desire.

For instance key documents from each project can be shown as part of the Programmes

## Licensing options

When you purchase the MSP® Method Template you can then use it on your server and it will be accessible to however many users you have licensed and for as many programmes as you wish to create.

MSP Method Template is included within the price of the core licence.

MSP Method template can be added for just £500+ vat

MSP Method template can be added for just £75+vat

MSP Method template can be added for just £75+vat

## Supporting Services

We can also provide you with further services to help you implement MSP including formal MSP training via one of our Accredited Training Partners. Prices on application.

If you want to get up and running as quickly as possible with your programmes we can also come in and help you personalise your Method Template to better match the language, culture and processes of your organisation. Good alignment here makes it much easier to introduce and embed MSP into an organisation. Our day rate for these personalisation services is £1,000+vat+T&S per day.

To explore further please contact us to arrange a visit, web meeting/demonstration or to request access to the evaluation versions of PROJECT in a box.
